# GoodData

Revolutionize Your Analytics With GoodData: The AI-fueled Platform

Effortlessly create innovative data products and integrate analytics capabilities wherever your users need them.

Why GoodData?

GoodData is more than just a BI tool, it's an analytics infrastructure. The **robust, scalable, and user-friendly analytics platform** offers comprehensive data integration capabilities, allowing you to **seamlessly consolidate disparate data sources**. Advanced analytical tools empower users to **generate insightful reports and dashboards**, facilitating data-driven decision-making and ensuring your analytics are ready for the future.

> **"The level of growth we've experienced would not have been possible without our partnership with GoodData."**

How GoodData Provides a Modern BI Experience

Drag-and-drop UI allows non-tech users to create and customize their own charts and dashboards, easing the load on your analytics team.

AI-powered features like forecasting, key driver analysis, and NLQ mean faster insights and decisions.

Engineers can create analytics environments faster than ever before with **collaborative code-based tools** and blueprints. Version control paired with a **robust semantic layer** results in a single source of truth.
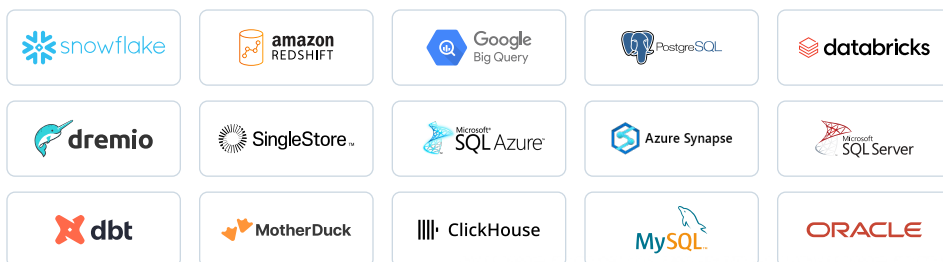

Connect and query your data source directly without the need to copy or move data. **Advanced caching** ensures low data warehouse costs.

Multitenant architecture allows you to distribute analytics to all your teams, partners, or customers, while keeping data separated and secure.

GoodData excels in data distribution, enabling the **seamless integration of analytics into your apps and workflows**. Choose your preferred embedding method – and **customize and white-label** to match your brand.

Flexible deployment options: The platform is available either as software as a service, or as an application that you can deploy on your own server.

GoodData connects with

snowflake	amazon REDSHIFT	Google Big Query	PostgreSQL	databricks
dremio	SingleStore	Microsoft SQL Azure	Azure Synapse	Microsoft SQL Server
dbt	MotherDuck	ClickHouse	MySQL	ORACLE

and more
